NakedSSL

↳ Fact sheet

NakedSSL is the easiest way to redirect naked domains to www-domains, even with SSL. NakedSSL was born out of necessity and designed and developed by the owners of okay bueno GmbH to improve their own workflow. What started as an internal project quickly turned into its own Software as a Service solution meeting a high demand not met by domain and hosting providers. NakedSSL offers free and premium plans as well enterprise support and a private API; and is used by agencies, freelancers, and business owners worldwide and is powering well renown websites, from the Royal College of Arts to start-ups like easyMovie and SoundStripe.

Additional info

↳ Founders: okay bueno GmbH / Jesús Espejo & Alexander Gerund
↳ Founding date: June 5th, 2018
↳ Number of domains redirected: 1.800+
↳ 100% developer-owned and fully independent
